About This Game

Follow Amon, the God of Air, on his quest to connect a world of puzzling optical illusions using Virtual Reality.

Look around, move around and play around with ancient 3D scanned sculptures from museums around the world.

Be sure to put your headphones on when putting together the historic pieces, as Amon is built with Binaural Audio to help you solve the puzzles.

It will be an epic journey that moves you. Literally.

Sorry, loved the concept, but the execution is lacking. Menu is finicky, graphics are jittery, and I spent more time trying to get the correct solution to register than I did finding the solution in the first place. If an update fixes performances, and allows puzzle solutions to be entered more consistently, I will update my review.
