Multiplayer was broken. Don't buy.. TL;DR: Decent game, but horribly programmed. Don't pay full-price, it was barely worth it at 7 bucks.

This is a fun little multiplayer roguelike, which there aren't enough of these days. My only complaint about the controls is that Dodge and Interact can't be bound to separate buttons. Either way, it's a decent game with somewhat intuitive controls and mechanics. However, the game has several bugs, some of which are easily (though non-intuitively) resolved, and some of which are unresolvable and frankly gamebreaking. From paying for an upgrade so that healing costs less only for it to charge you the full amount, to not being able to open the foodstamp shop at all, and several others. Fun, but really buggy and it can definitely detract from the experience.. Definitely one of the best 99c games out there, DEFINITELY WORTH GETTING 9/10.. From just a simple chapter 1 I was enticed by this game. It's just a hidden objects game. Some items you would think that you are finding consecutively but there is a pattern you must follow. I'd play the next few chapters. It kills time and lets you work your mind a bit.. Clumsy and too pricy. Requested for the refund. Too many bugs and out dated UI.. Happy International Woman's Day

step 1: buy game

step 2: question life choices

step 3: look in the mirror

step 4: cave head in on mirror

step 5: enjoy hell, its more fun than this game

step 6: butts. None of the keyboard controls worked, so I could not play this at all. Disappointed.. Excellent game, super tense and has you going back for more!. Fun at a party or with a small group of friends. I've never seen anyone pass up a chance to play, and those that can't for whatever reason can be in the audience and take in the unique pictionary-esque wackiness.. It's awesome with Goa and some good weed
